https://abdullahs-restaurant.netlify.app/

2023

E-Commerce Websites
Technonlogy: Mern Stack

A Website having both facilities where you can signup/login as a seller or a customer .You an list items,update manage,track orders as a seller and search, order items,add to cart, pay money as customer.
Front end deployed on :

https://abdullahs-e-commerce-kingdom.netlify.app/

There maybe an issue after I deployed it's front-end due to missing backend connectivity in loading data/products from backend, so here is a demo of full project perfectly working on my device:
https://shorturl.at/zLKWh

E-Commerce Website
Technonlogy: React Js

A different looking but an online shopping platform that has different categories of products listed and you   can order products from there.
Deployment:

https://e-mart-wesbite.netlify.app/

2023

Youtube Clone
Technonlogy: React/Typescript Js

A Youtube Clone having Home Page and sidebar pages Demo:
https://abdullahs-youtube-clone.netlify.app/

Netflix Clone
Technonlogy: React Js

It is built with React JS and uses the TMDB API to pull data/images. As I'm stealing data from official site without permission so site might be suspended sooner.
Deployed on :

https://abdullahs-youtube-clone.netlify.app/

2022

Plastic Surgery Website
Technonlogy: HTML, CSS, Javascript

It was a website comprising of 60+ pages that I made for my client which provided services related to Plastic surgeries or face features operations. Due to large file, faced some issues in deployment.
Demo:

https://shorturl.at/4SpFE
